Participants Needed for Spinal Cord Injury Study

Reducing the risk of pressure ulcers using Neuromuscular Electrical Stimulation

This study aims to develop a new way to prevent pressure ulcers using electrical stimulation during prolonged sitting.

This is part of an initiative to improve the long-term health and quality of life for those with Spinal Cord Injury.

To participate in this study, you must:

• Be at least 18 years old,
• Have a Spinal Cord Injury for more than two years,
• Have doctor’s approval to participate,
• Have proof of medical insurance (private or government)

Time commitment: Three visits will be required. The first visit will involve a neurological exam, which requires about one hour. The second and third visits will involve sitting experiments, which will each last up to two hours.
